Notes :

- The tea industry is seasonal in character, three monthly figures can not be taken as indicative for the full year.
- As the Company is engaged in business of cultivation, manufacture and sale of tea (single business segment), which is seasonal in character, figures for the quarter year ended 31st December 2017 should not be construed as representative of likely result for year ending 31st March 2018.
- Stock of made tea as on 31st December 2017 has been valued at lower of estimated cost of production (based on estimated production and expenditure for the financial year) and net realisable value. Production of tea not being uniform throughout the year, stock-valuation will be unrealistic if it is based on actual production and expenditure up to 31st December 2017. The effect of any variance from actual cost applicable to total valuation is not readily ascertainable. The aforesaid method of stock valuation is consistent with the accounting policy of the Company for the purpose of determining quarterly result.
- As sales are recognised on passing of property in goods as per the terms of sales on completion of auction in case of auction sale and in case of Consignment sale, turnover for the quarter includes effect for Rs. 20.51 lacs of goods which have been sent on Consignment basis in previous year and during up to 30.06.2017, on basis of receipt of sales proceeds and against which accounts sales are still pending.
- As income tax liability and agricultural liability will depend on net results for the year ending 31st March, 2018 and in view of the seasonal nature of tea business, the position with regard to provision for Current Tax & Agricultural tax and also Deferred Tax will be determined at end of the year.
- The Figures for the quarter ended 31st December 2017 are also IND AS Compliant.
- Reconciliation between results previously reported under erstwhile Indian GAAP and as presented now under IND AS for the quarter ended 31st December 2017 are given below.
